CLINICAL  
SUPPORT

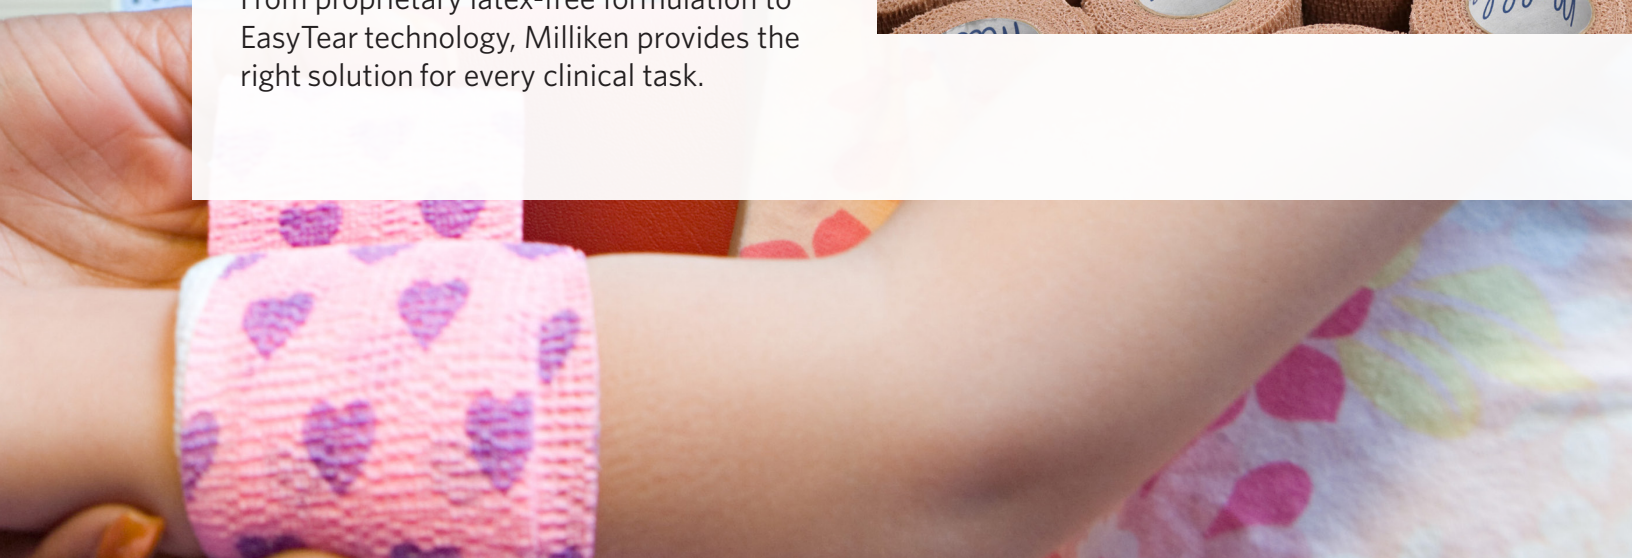

BREATHABLE +  
LIGHTWEIGHT

Milliken's CoFlex® cohesive bandages help patients and caregivers when a self-adhering bandage is desired to secure, protect or compress. It is a gentle solution whenever adhesive is not wanted.

From proprietary latex-free formulation to EasyTear technology, Milliken provides the right solution for every clinical task.

## THE COFLEX DIFFERENCE

### For the Patient

- Improves comfort with lightweight and breathable material
- Conforms to area of application
- Stays in place

### For the Application

- Secures primary dressings and devices on patients
- Compresses to help control swelling
- Protects patients with latex-free options

### For the Clinician

- Improves clinical ease-of-use with EasyTear technology
- Delivers consistent application
- Offers HCPCS codes

Milliken's CoFlex cohesive bandages are designed to simplify and streamline the healthcare clinicians job.

Not made with  
natural rubber  
latex

## COFLEX LF<sup>2</sup>

Milliken's CoFlex LF<sup>2</sup> is ideal for high-risk patient populations and surgical patients. CoFlex LF<sup>2</sup> is designed to provide comfort to patients with sensitive skin, eliminate the risk associated with latex sensitivity and protect the sterile field in surgical procedures.

- Soft and comfortable – gentle on the skin
- Ideal for OR application
- Water resistant for arthroscopic procedures\*\*
- Sticks directly to a wet primary dressing
- EasyTear technology\*
- Controlled compression – will not constrict or loosen over time
- Stays in place – does not shift or unravel with use

CoFlex LF<sup>2</sup> is available in single color cases or a color pack for variety!

Color Pack (CP) Includes: Neon Pink, Blue, Purple, Light Blue, Neon Green, Red

When ordering, please indicate catalog # and color code. For example, 3100TN-030 (XX = color code).

## YOU CONTROL THE TENSION

1. No to low tension
2. Medium tension
3. High tension

## APPLICATION AND REMOVAL TIPS

1. The CoFlex family of bandages will not loosen or tighten over time, therefore you should wrap the bandage at desired tension and compression.

2. Upon completion of wrapping, grasp bandage between fingers and remove stretch - hand-tear\* or cut the bandage to desired length. Relax the last 2" of bandage and then press down.

3. Seal the end of the bandage wrap with your finger, lightly meshing the top of the bandage into the bottom layer. This will provide long staying power.

**Removal:** CoFlex bandages may be removed by unwrapping or with bandage scissors.

## HCPCS CODES (Healthcare Common Procedure Coding System Codes)

Product	Size	HCPCS Code
CoFlex CoFlex Med CoFlex NL CoFlex LF <sup>2</sup>	1" x 5 yds. 1.5" x 5 yds. 2" x 5 yds.	A6453
CoFlex CoFlex Med CoFlex NL CoFlex LF <sup>2</sup>	3" x 5 yds. 4" x 5 yds.	A6454
CoFlex CoFlex Med CoFlex NL CoFlex LF <sup>2</sup>	6" x 5 yds.	A6455

Centers for Medicare & Medicaid Services (CMS) has verified that the HCPCS codes listed above have been assigned to Andover Healthcare, Inc.
