

## LET'S STAY FOCUSED ON WHAT'S IMPORTANT.

We need to put the planet front and center. Coexist by using kinder materials and a smarter process. Be respectful and inflate humanity in every corner of the company. Simple beliefs to live by and invent by every day. When the Milliken Airbag team makes a promise to care for the planet, it's not cliché hot air. It's the focal point.

### Water-based coatings

Milliken & Company is the first in the industry to offer water-based coatings for rollover curtain airbags, decreasing fogging and VOCs. As we develop our next generation coatings, we're focusing on net-zero and reducing the overall weight of the airbag by requiring less coating material while maintaining overall performance.

### Safety

Safety has always been Milliken & Company's number one priority. Our facilities are Voluntary Protection Program (VPP) certified, ensuring we go above and beyond OSHA requirements by maintaining injury rates below national averages. All safety incidents are reviewed in detail to determine countermeasures and prevent recurring accidents.

### Zero waste to landfill

Milliken & Company set a goal to eliminate all waste to landfill by 2025. Our Pine Mountain, Gerrish and Valway plants set the example by sending zero waste to landfill in 2021.

### ISO certified

All airbag textile plants are ISO 14001:2015 certified and therefore required to manage environmental responsibilities in a systematic manner. Our Pine Mountain, Gerrish and Valway manufacturing sites diligently create solutions to reduce the risk of environmental impacts.
